

Partnerships for pathways to Higher Education and science engagement in Regional Clusters of Open Schooling

PHERECLOS

Transnational Mentoring Partnership (TEMP) program provides an opportunity to realize small scale initiatives related to Open Schooling and mutual learning among mentoring partners in the framework of the PHERECLOS

TEMP CONSORTIUM

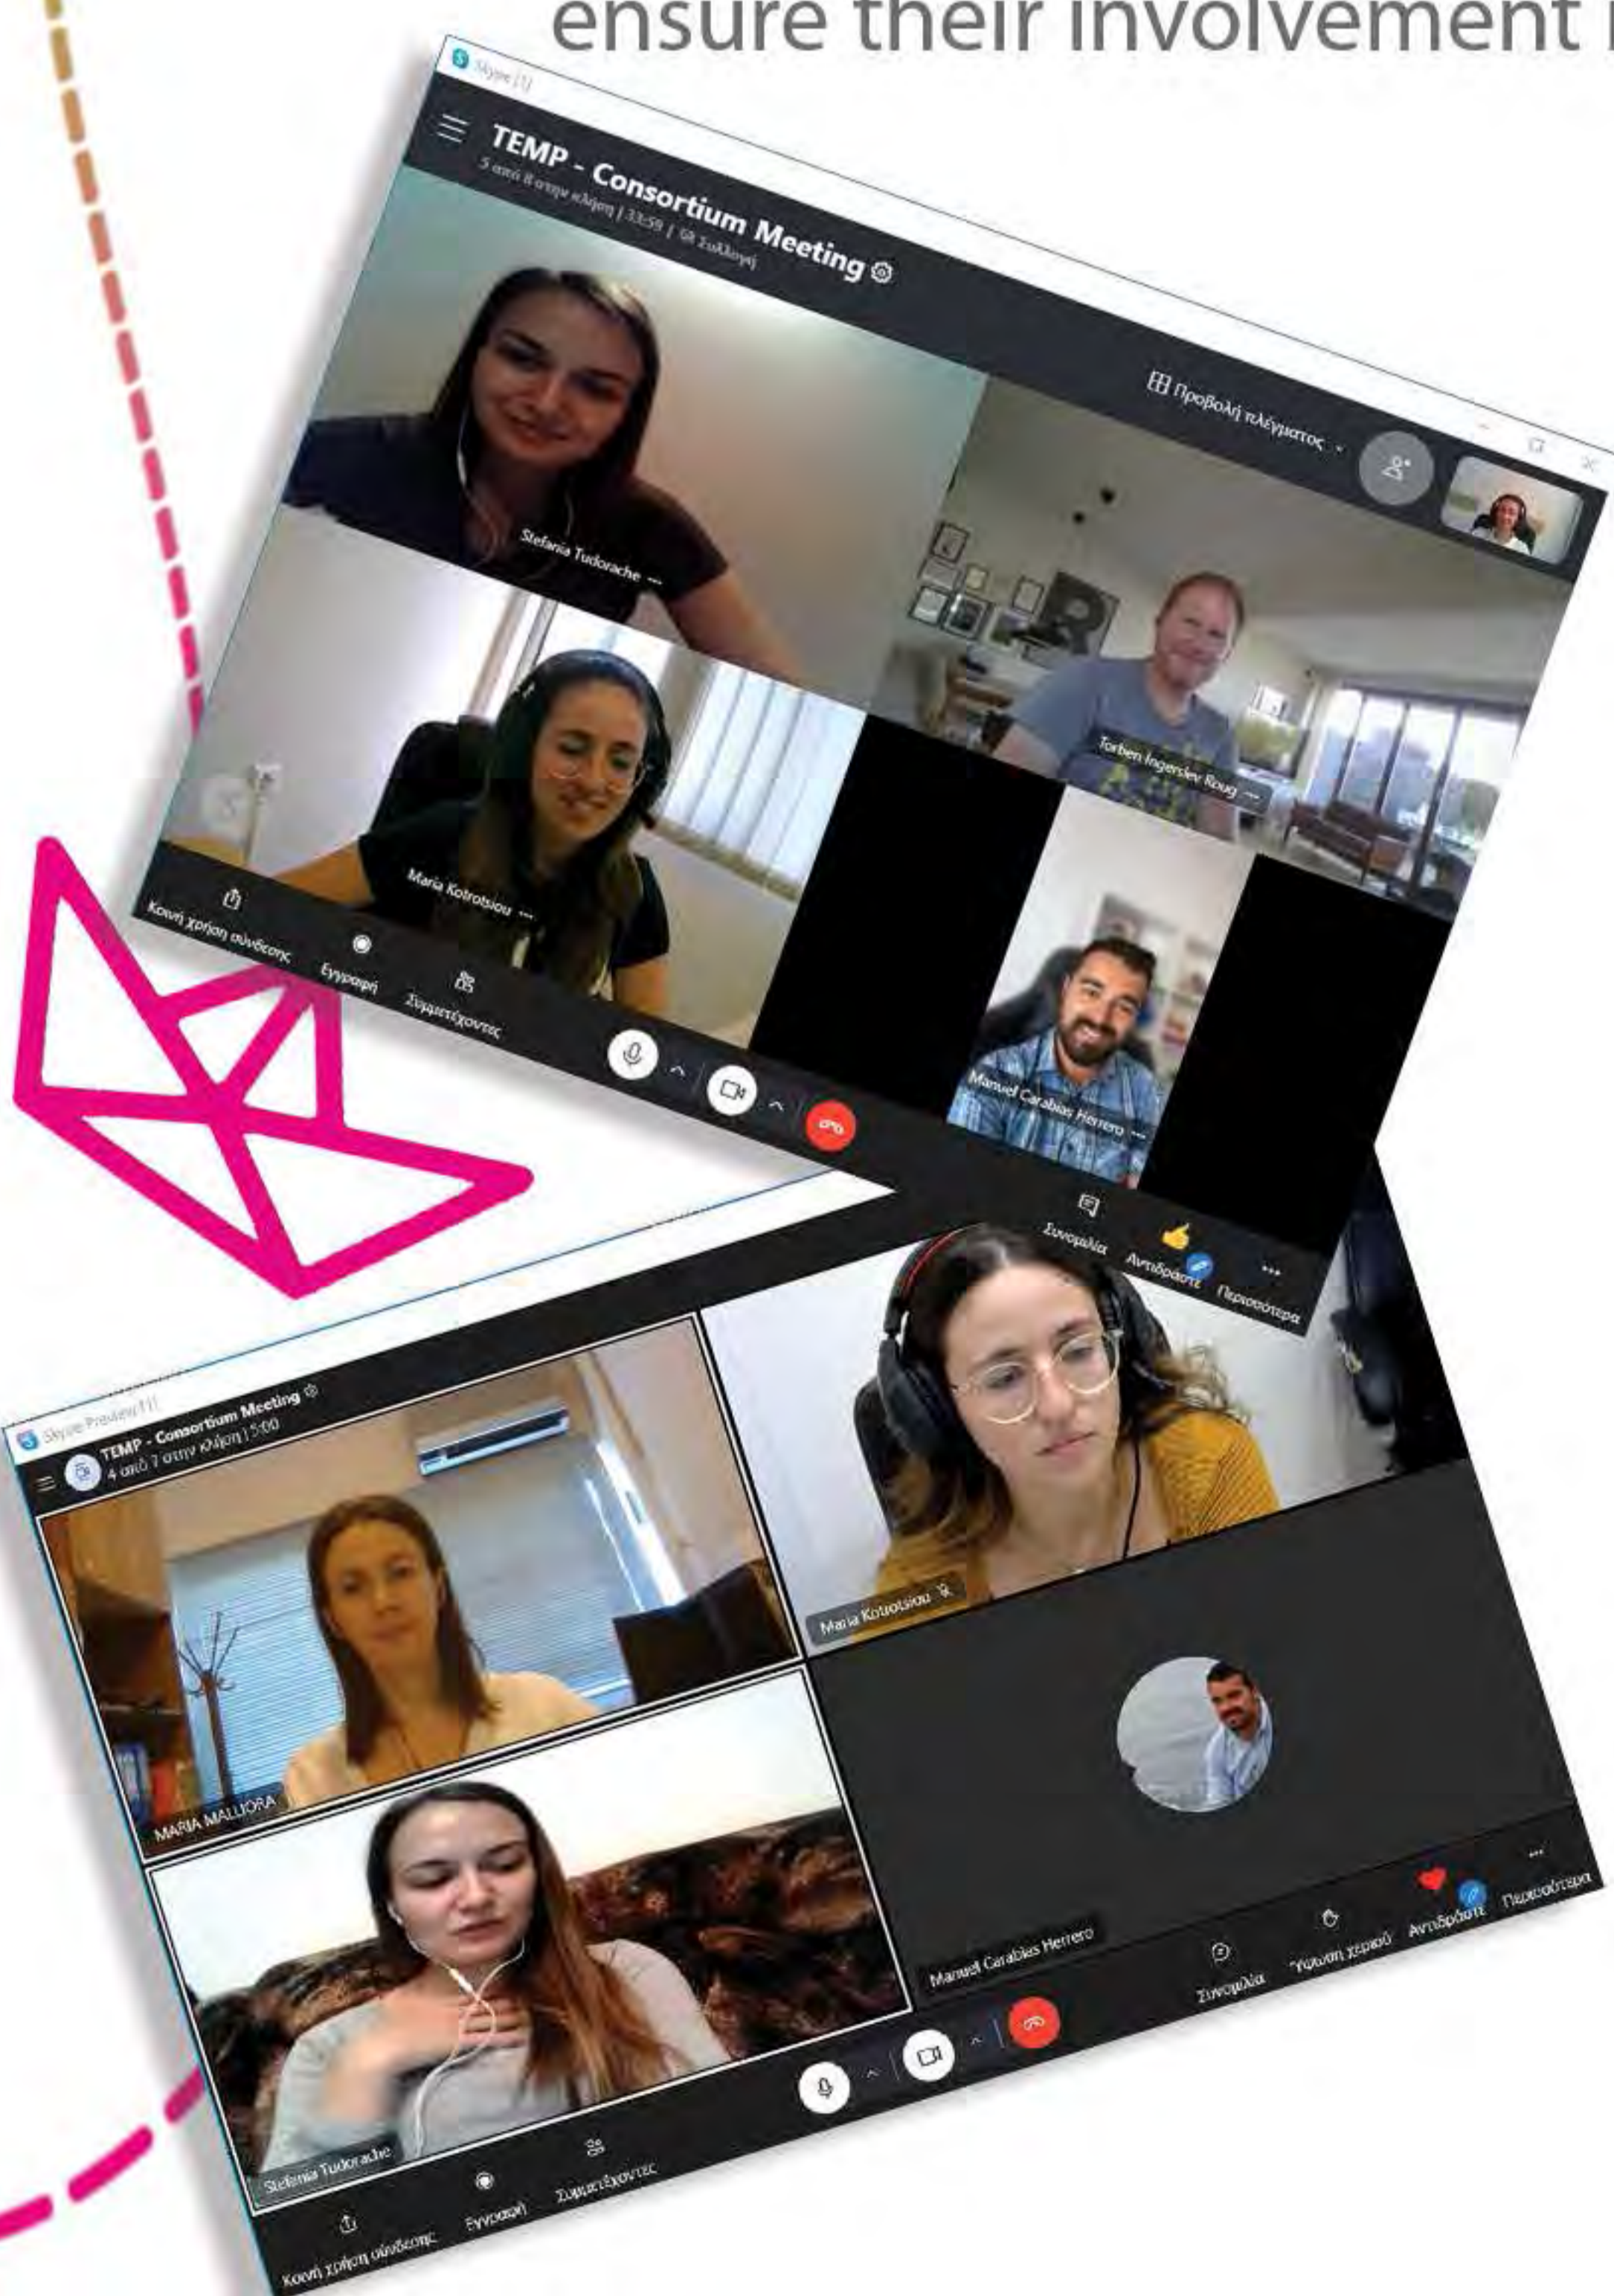

The month of September was dedicated to the design of the Educational KIT, containing the explanation of each innovative methodologies and its appliance in different educational fields, as well as the activities proposed for each.

The partners held two online meetings in order to discuss the implementation of the Training Course and the coordination of the pilot testing and to organize all the logistical and pedagogical aspects. During these meetings, the partners decided on how to select the teachers, in order to ensure their involvement in the next step of piloting the activities with their pupils.

The partners also drafted the training plan, in terms of topics and timing, in order to guarantee that the teachers will get the proper knowledge of the methodologies, activities proposed and their specific aims.

The training course will be organized by E-SCHOOL in the beginning of October and it aims to train teachers on the proposed innovative methodologies and the activities created by the consortium.

The pilot testing will be conducted by the teachers of DDE Karditsa with pupils in October and November and its aim is to validate and receive feedback on the methodologies and activities proposed

This process will help us to get feedback on the Educational KIT, in order to be able to ensure a qualitative and useful educational resource for professionals and learners.

The meetings also served to set the ground for the scientific article on the importance of adding non formal activities based on innovative educational methodologies into all educational sectors, which will be written by the University of Valladolid.
